## Full Stack Web Developer

### PROFESSIONAL SUMMARY

Dynamic and skilled Full Stack Web Developer with expertise in JavaScript, Express.js, React.js, and MongoDB. Collaborates effectively with cross-functional teams to translate project requirements into scalable web applications. Proficient in designing server-side APIs and optimizing database models. Strong problem-solving skills, attention to detail, and excellent communication abilities. Stay up-to-date with latest

### PROJECTS

#### 1. OutFitter | |

React | Vite | Tailwind css | | Mongo DB | Mongoose | Node Js |

##### Express

- Developed a full stack ecommerce website using React, Vite, Tailwind CSS, MongoDB, Mongoose, Node.js, and Express
- Implemented user authentication and authorization with login and signup functionality
- Designed and implemented a filtering mechanism for products based on categories (kids, women, men)
- Created a cart feature with separate databases for each user
- Built a single product page to display detailed information about a specific product
- Developed an admin page for adding new products and viewing website data

#### 2. Studybuddy | |

- Developed a study-based website using React, Redux, Chakra UI, Express, Mongo DB, and Node.js.
- Implemented features such as login and sign-up pages for user authentication.
- Created functionality for sorting, filtering, and searching subjects for easy navigation.
- Built the single subject and their study material pages for users to study according to their subjects.
- Implemented an admin page for managing products and database.
